

AI FOR INDUSTRY AND MANAGEMENT TRAINING

- **Format:** Online self-learning module
- **Duration:** 5 hours
- **Target group:** Students, Managers
- **Level:** EQF 6
- **Provider:** Comenius University
- **Language:** English
- **Certificate:** Digital badge
- **Costs:** Free

This modular training provides an introduction to artificial intelligence and its application in industrial and business environments. The course is designed for both technical and non-technical participants and introduces core concepts such as machine learning, data analytics, intelligent automation, and AI-supported decision-making.

The training focuses on practical industrial applications of AI, including predictive maintenance, process optimization, quality control, automation, and data-driven management. Participants will also become familiar with ethical, legal, and governance aspects related to AI adoption in organizations.

The course combines lectures, practical examples, discussions, and case studies to help participants understand, evaluate, and apply AI technologies in real-world organizational and industrial contexts.
