

DIGITAL TRANSFORMATION IN INDUSTRY TRAINING

- **Format:** Online self-learning module
- **Target group:** Students, Managers
- **Provider:** Comenius University
- **Certificate:** Digital badge
- **Duration:** 5 hours
- **Level:** EQF 6
- **Language:** English
- **Costs:** Free

This modular training provides an introduction to digital transformation with a focus on industrial and organizational environments. The course is designed for both technical and non-technical participants and introduces key concepts such as digital strategy, process optimization, implementation of information systems, and integration of modern technologies including AI, IoT, and cloud computing.

The training emphasizes practical application in industrial contexts, including business process transformation, data-driven decision-making, and organizational change management. Participants will also become familiar with challenges related to technology adoption, governance, and risk management in digital environments.

The course combines lectures, practical examples, discussions, and case studies to help participants understand, evaluate, and support digital transformation initiatives in real-world organizational and industrial settings.
